

WORK UNDERWAY...

off to a good start with a great team

Tarpan received NTP in February to begin construction on our Cameron Creole Restoration project for NRCS. Terrace work is being performed by Frogco, our 1st Tier sub. They own a fleet of specialized equipment to construct these terraces. Berry Bros. is also onsite with Big Buford, they are dredging the access channel in the ICWW. Tarpan crew is onsite daily performing survey layout ahead of the marsh buggies. Like many coastal restoration projects, the elements are always challenging but the intent of saving acres is so rewarding.

NRCS CS-49 Cameron Creole Project

CAT MARSH BUGGIE
owned and operated by
Frogco Amphibious Service, Houma LA

BIG BUFORD
owned and operated by
Berry Bros., Berwick LA
